

THE GREAT NORTH AMERICAN EOLIPSE

Safety Tips

WARNING:

Looking directly at the uncovered sun without protection can cause:

- Retinal burns
- Blurred vision
- Permanent vision loss

Your retinas do NOT have pain receptors, so you can not feel if damage is being done.

TRAVELLING TIPS

- Avoid looking at the eclipse while driving.
- Do not stop or get out of your car to view the eclipse.
- Stay updated on road conditions before, during, and after the eclipse.
- Plan ahead and expect increased traffic and road congestion.

EYE SAFETY

- Do NOT look at the sun without proper protection. Even a quick glance can be harmful to your vision.
- Glasses with specialized filters adhering to ISO 12312-2 international standards can be worn to prevent eye damage.
- If proper protection is unavailable, consider alternate viewing methods like an eclipse box or a livestream.

Please visit www.asc-csa.gc.ca to learn more about proper Solar Eclipse safety. To watch the **March 8** livestream presentation, visit [@sixnationsGR](https://www.facebook.com/sixnationsGR) on Facebook or Youtube.
